

BHAVITH SHETTY

Senior BI Analyst | Microsoft Fabric & Power BI | DAX, Semantic Models & Governance
Mumbai, Maharashtra, India • bhavith-portfolio.vercel.app • github.com/bhavith1993

PROFESSIONAL SUMMARY

Senior BI analyst with **5+ years** delivering modern analytics on **Microsoft Fabric** and **Power BI**. Hands-on across **OneLake, Lakehouse, Fabric Warehouses, Dataflows Gen2, Direct Lake**, workspace and capacity management, and deployment/lifecycle. Advanced in **DAX, Power Query (M)**, semantic modeling, and performance tuning, with strong **RLS, governance, and access controls**. Proven at migrating legacy reports to Power BI/Fabric and delivering executive, operational, and analytical reporting at enterprise scale.

MICROSOFT FABRIC & POWER BI

- **Fabric platform:** Power BI in Fabric, OneLake, Lakehouse, Fabric Warehouses, Dataflows Gen2, Direct Lake; workspaces, capacity and workspace management
- **Governance & lifecycle:** Security and governance (Purview, RBAC, RLS); deployment and lifecycle management (Git, Dev/Test/Prod pipelines)
- **Power BI:** Advanced DAX and calculations, semantic model design and optimization, Power Query (M), dashboards, scorecards, self-service analytics
- **Performance & tooling:** Tabular Editor, DAX Studio, VertiPaq Analyzer; report performance tuning and troubleshooting
- **Emerging:** Familiar with Copilot-enabled analytics and developing experience with Fabric IQ and AI-powered Fabric capabilities

PROFESSIONAL EXPERIENCE

Senior BI Analyst / Consultant

Independent (I4C mandate, Montreal)

Jan 2026 – Present

Remote

- Deliver modern analytics on **Microsoft Fabric**, building semantic models and **CAPEX/OPEX** reporting on **Direct Lake (Delta)** for live reporting.
- **Migrated legacy Power BI reports to Fabric-enabled reports** and standardized semantic models for performance and scalability.
- Implement **security and governance** (Purview, RBAC, RLS) and manage workspaces, partnering with stakeholders on requirements and delivery.

System Analyst, Power BI and Data Engineering

Brookfield Renewable Partners

Apr 2023 – Dec 2025

Remote

- Designed and maintained interactive **Power BI** dashboards, scorecards, and **semantic models** on **Microsoft Fabric**, optimizing performance (60% faster loads).
- Built **Lakehouse** and **Dataflows Gen2** pipelines and reusable **DAX** KPIs and frameworks; automated 12+ settlement reports via Fabric (~40 hrs saved biweekly).
- Implemented **RLS, governance, and access controls** (Purview/RBAC, SOX), reducing data-quality incidents by **80%**.
- Owned **deployment and lifecycle management** via Git and Dev/Test/Prod pipelines, and supported enhancements and production support.
- Delivered executive, operational, and analytical reporting, engaging technical and business stakeholders throughout.

BI Developer (Contract)

Lululemon Athletica

Sep 2022 – Mar 2023

Remote

- Built Power BI dashboards and semantic models over large retail datasets, retrieving data via SQL Server stored procedures.
- Developed KPIs (inventory accuracy, stock aging, fulfillment) and self-service reporting for operations stakeholders.
- Performed report testing, validation, and refresh configuration for reliable delivery.

Senior Engineer

Adani Solar & PV Power Technologies

Jun 2016 – Dec 2020

India

- Built Power BI dashboards and data models over production and cost data, using SQL Server and Excel sources.
- Analyzed operational and cost datasets to support management decisions.
- Automated recurring reporting with advanced Excel and SQL, improving turnaround.

EDUCATION

- **M.S. Analytics (Computational Analytics)**, Georgia Institute of Technology (in progress)
- **PG Diploma, Data Analysis for Business Intelligence**, St. Clair College, Canada; **B.Tech, EEE**, Shivaji University
